Hurricane Alberto Commodities Model

Landfall Is Occurring

For Official Use Only!

The amount of commodities forecasted is based on Mission Guide Book requirements (8 pounds of ice per person per day and 3 liters of water per person per day) and SME input and the above table indicates suggested needs based on phased deployment of a commodities distribution system. The assumption in this scenario is that 30-40% of the resident population affected by Alberto will have power outage in this area will cause a need for water.
